

Marketplace Health & Liquidity

Ecosystem Liquidity Ratio

39.995%

Measures the efficiency of the marketplace by calculating reciprocal success. High ratios indicate a healthy, low-friction environment.

Global Kindness Index

-0.0023

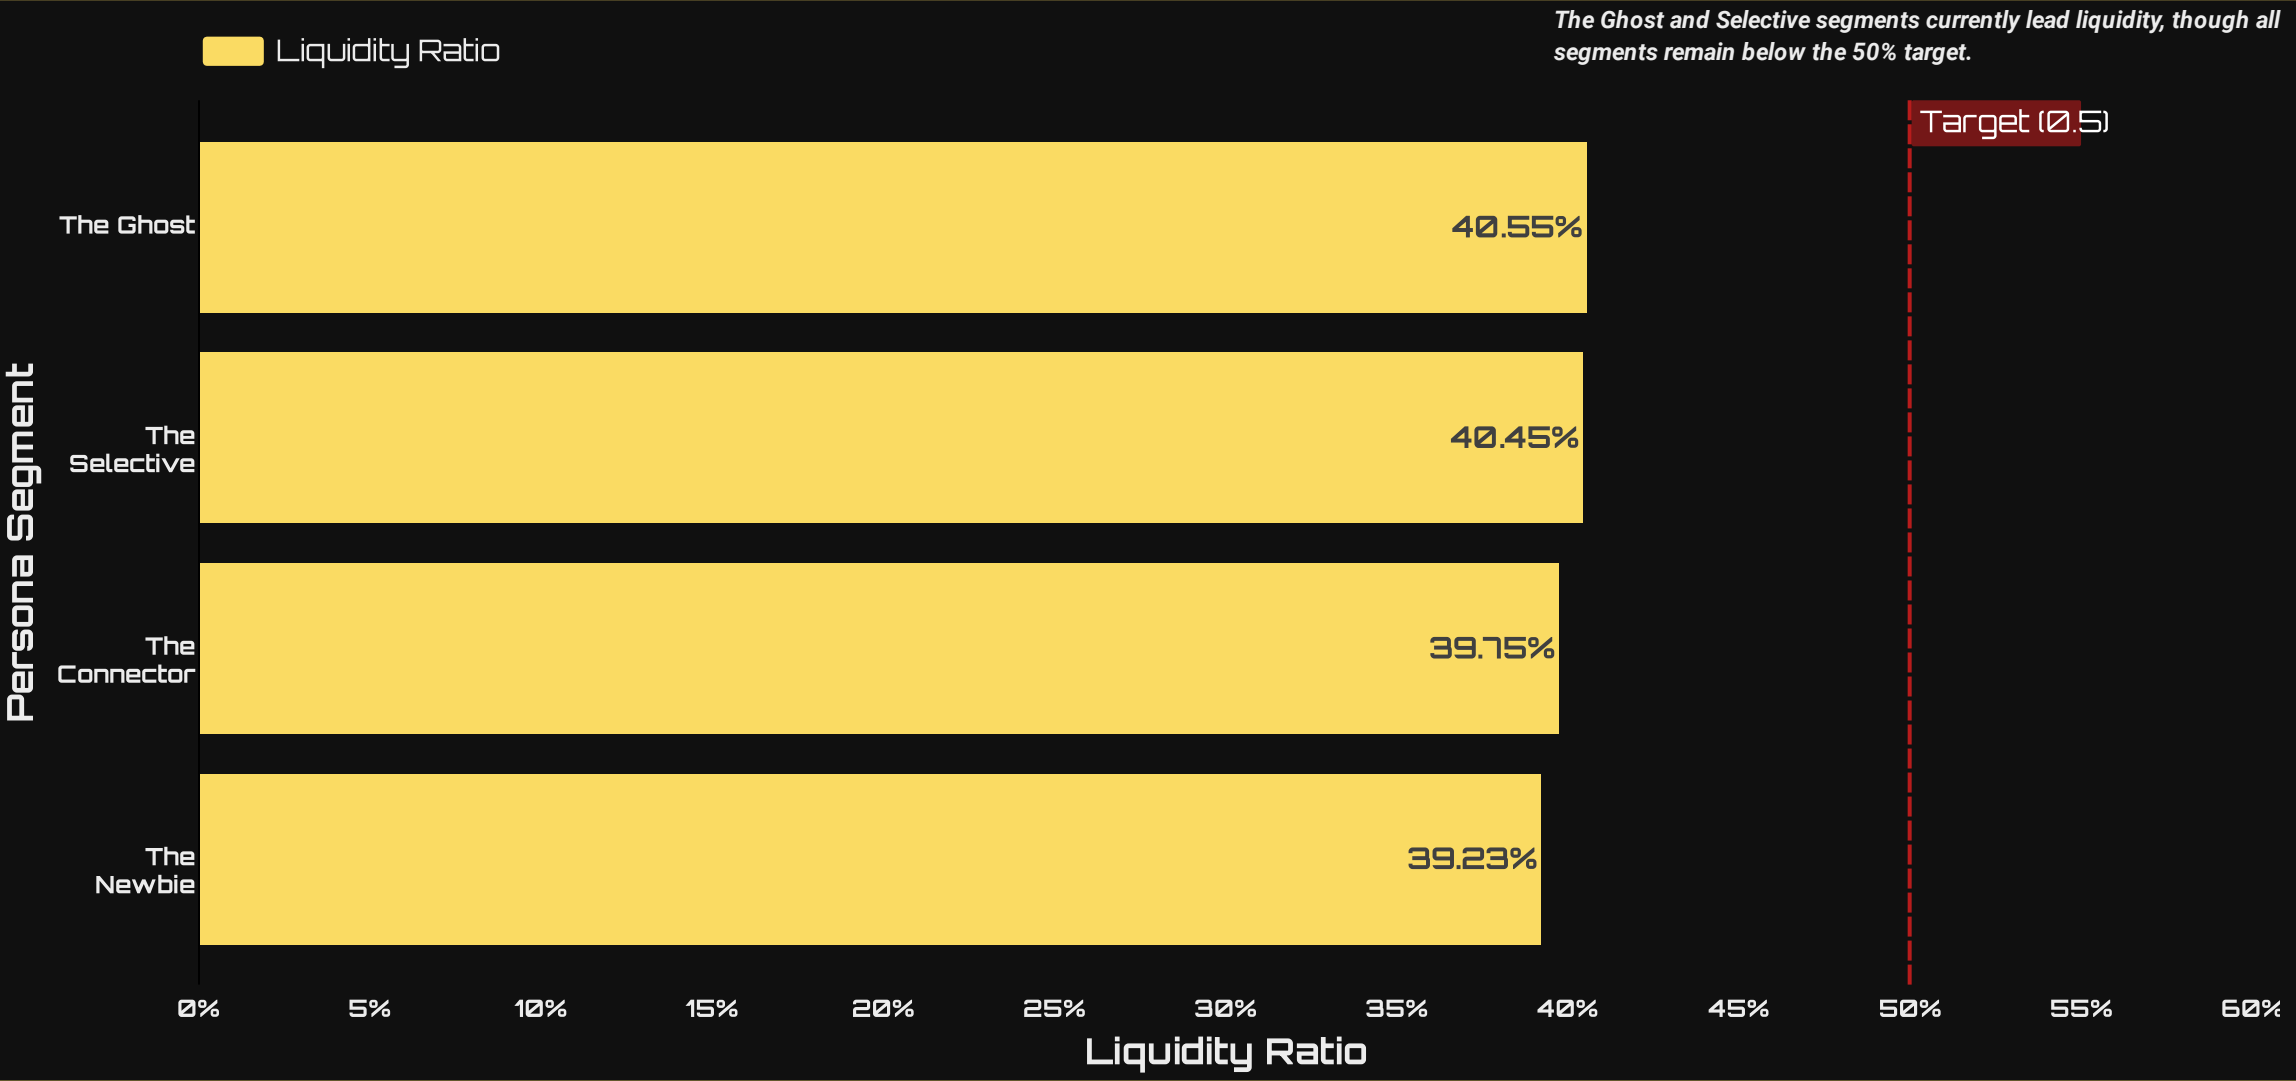

The aggregate sentiment score across all platform interactions. It serves as a North Star metric for Bumble's "Kind Connections" mission.

Active Member Base

50,000

Total volume of unique members within the current analytical window. This provides the scale context for the health metrics.

Liquidity Ratio Ranking by Persona Segment

Behavioral Segments & Intent

Power User Concentration (Cluster 0)

28.19%

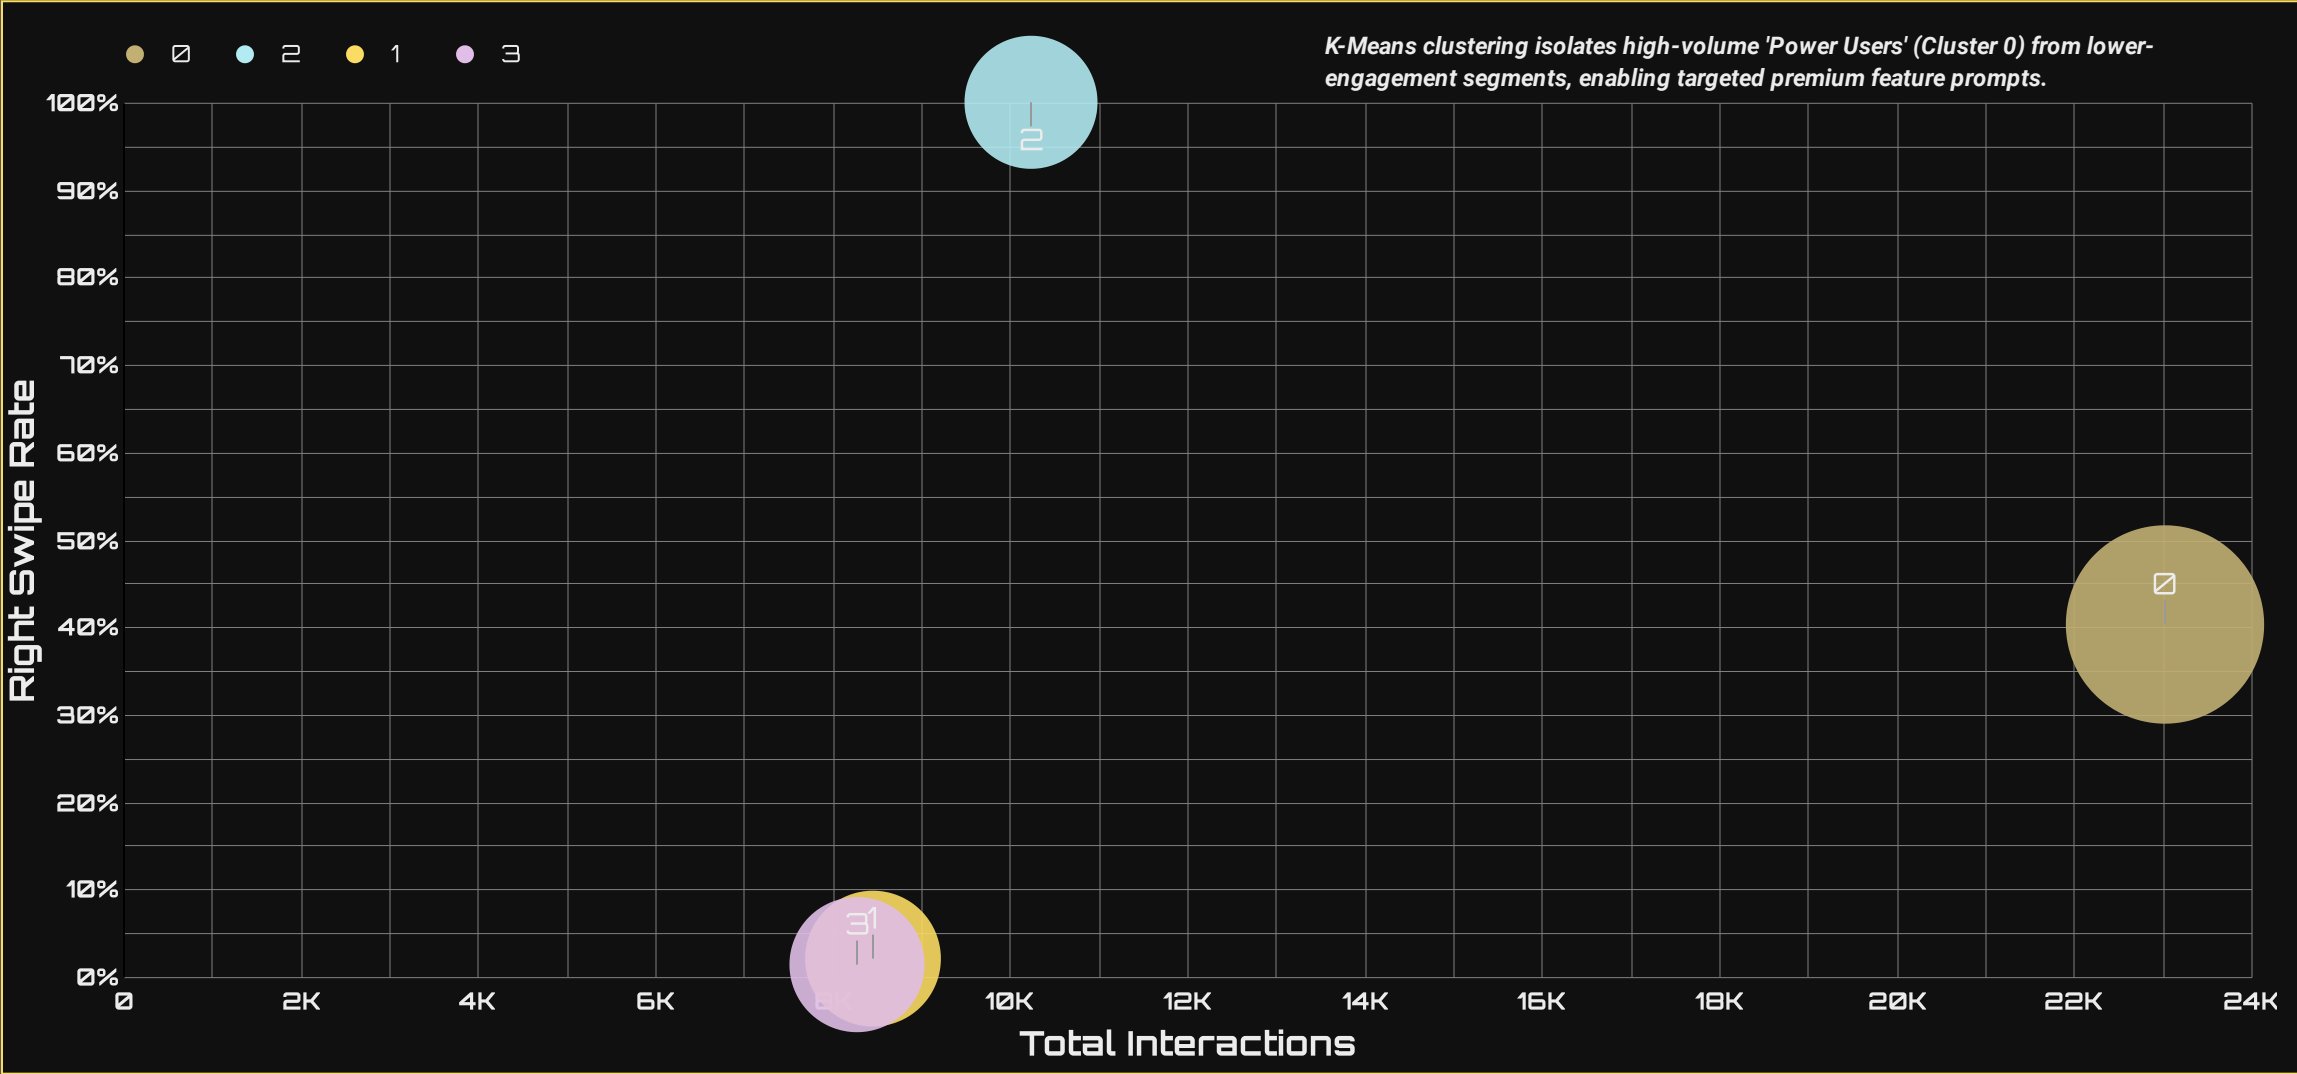

Approximately 28.19% of the user base is categorized within Cluster 0. In Looker Studio, ensure your calculated field correctly filters for behavioral_cluster = 0 against the total member count.

Average Interaction Depth

1.5807

Cluster 0 shows a significantly higher interaction depth (2.58) compared to Clusters 1, 2, and 3, which all hover around a depth of 1.2. This confirms that Cluster 0 is indeed the "Power User" segment driving high engagement.

Behavioral Intent: Interaction Volume vs. Swipe Selectivity

Monetization & Causal Attribution

Gross Portfolio Revenue

\$232,610.00

Total revenue generated across all product types (Subscriptions, Spotlights, SuperSwipes). This is the primary monetization success metric.

Average Revenue Per User (ARPU)

\$4.65

The financial value contributed by each unique member on average. High ARPU suggests successful conversion of behavioral intent into revenue.

ARPU Yield by Acquisition Channel

Revenue Distribution across Behavioral Clusters

Monetization is highest in Clusters 0 and 2, confirming that behavioral interaction depth is a primary driver of financial value.
